Clinically Validated Liposomal Berberine

The Problem

- Limited bioavailability of traditional Berberine supplements, requires high doses and potentially can lead to gastrointestinal side effects.
- Difficulty in achieving desired efficacy in Weight Management, Blood Sugar control, and other applications.

The LIPOKON™ Solution

Enhanced Bioavailability: Our proprietary **LIPOKON™** Technology ensures maximum absorption, allowing for a significantly lower effective dose of 450mg per day compared to 1500mg of Standard Berberine

Clinically Proven Efficacy: Backed by clinical trials and published papers, our Lipokon™ Berberine has demonstrated impressive results in Weight Management and Blood Sugar Control.

Reduced Side Effects: By minimizing the required dose, **LIPOKON™** Berberine reduces the risk of side effects, thus improving customer satisfaction and loyalty.

Human Clinical Trial on **LIPOKON™** Berberine

A finished **LIPOKON™** Berberine formulation can now be supported by a Human Clinical Study, demonstrating improved performance compared to conventional Berberine formats, and this is backed by Two Levels of Scientific Validation and Published **LIPOKON™** Technology.

Why Choose **LIPOKON™** Berberine

- Enhanced bioavailability through Liposomal delivery
- Improved tolerability versus conventional Berberine
- Lower effective dose potential
- Strong scientific credibility for brand storytelling
- Suitable for making value added formulations

What Brands Can Communicate

- “Formulated using **LIPOKON™** Technology (published)”
- “Clinically studied **LIPOKON™** Berberine”
- “Designed for superior absorption and tolerability”

Key Application Areas

- Blood sugar management
- Weight management
- Metabolic health
- Insulin sensitivity support

Progressive Weight Loss Pattern:

Parameter	Lipokon™ Berberine (450 mg)	Standard Berberine (1500 mg)	Difference
Day 90	1.86 kg reduction	1.64 kg reduction	13.4% greater reduction

Progressive BMI Change Pattern:

Parameter	Lipokon™ Berberine (450 mg)	Standard Berberine (1500 mg)	Difference
Day 90	2.67% reduction (↓)	0.85% reduction (↓)	3.14× greater reduction

Superior Result with 1/3rd Dosage

LIPOKON™ Berberine combines a published liposomal delivery technology with a human clinical study setting it apart from commodity Berberine.
